ILLSDALE

LANDSCAPE COMPANY

Indianapolis, Indiana

CATALOGUE No. 4

AN INVITATION TO HILLSDALE

Those interested in Trees, Plants and beautiful Gardens are always cordially welcome at Hillsdale. Here at our nursery, we maintain one of the largest and most beautiful rock gardens in Indiana, extensive ornamental shrubbery and evergreen plantings, and spacious perennial and rose gardens—all for the benefit of our friends and customers, and to help them get new ideas for making their own gardens more completely beautiful and satisfying.

We urge you to visit our nursery where trained horticulturists and members of our designing department will spare no effort to see that your garden needs are completely satisfied in the most efficient and economical manner.

LOCATION

The office and nurseries are one-quarter mile south of Castleton and eight miles northeast of Indianapolis. To reach us by motor from Indianapolis, take the Fall Creek Parkway North Drive at the intersection of State Road 13 and Keystone. Proceed to Millersville where you jog left through Millersville. Continue on the Millersville Road one mile beyond Millersville and one-quarter mile beyond the broadcasting towers of WFBM to the intersection with the Johnson Road. Our sign is on the corner. Turn left (north) on the Johnson Road and continue a mile and a half to the nurseries.

A second route is to drive out on the Noblesville Road, State Road 13, to Allisonville, approximately five miles beyond Indianapolis city limits. Turn right (east) on to Eighty-Sixth Street at Allisonville, sign on corner, and proceed one and one-half miles to Castleton. Turn right (south) in Castleton to nurseries.

For your convenience, we are operating a second sales ground at Hillsdale Nursery No. 2. This is located on the Noblesville Road, State Road 13, just north of Forty-Sixth Street. Here you will find personnel and equipment capable of filling small retail orders quickly and efficiently.

Address all communications to The Hillsdale Landscape Company, R. R. 13, Box 158, Indianapolis, Ind.

Free telephone service with Indianapolis—BRoadway 5495.

A Greeting to Our Patrons and Friends

We invite you to look through the pages of this catalogue to see the many varieties of plants, trees and shrubs that we are able to offer you after twenty-two years of constant growth and improvement. Each year has found us larger and more able to serve you than the year before.

We use only the best and most modern methods of cultivating and propagation and on our completely drained and thoroughly fertilized fields, obtain only very healthy and vigorous plants. Since our stock is all carefully dug, handled and packed and all precautions taken to have our varieties true to name, our patrons are assured of as near complete satisfaction as possible.

A telephone call, letter, or personal call at the nursery will assure you of prompt delivery of all plants which you desire.

With a most hearty good wish for unusual happiness and joy in your garden this year, we shall consider it a genuine pleasure to serve you.

Sincerely and cordially yours,

THE HILLSDALE LANDSCAPE CO.

OUR LANDSCAPE DEPARTMENT

We maintain a thoroughly trained Landscape Organization whose members, after years of study and invaluable practical experience, have attained rare skill in the designing and planting of gardens, both large and small, of unusual beauty and merit. We want all of our customers to realize that we consider no job too small nor too large to command our best efforts and finest skill.

Without charge or obligation we will have one of our experts visit your grounds. He can give you an estimate of the small charge for preparing your plan. This plan will include a list of the proper plants required to produce the effects you desire. Also, it is so prepared that you may complete the planting at one time, or spread it over a period of years. It will show the proper location of the house, drives, walks, pools, benches, pergolas, terraces and of every plant. The value of such a plan must be apparent to everyone.

JAPANESE CHERRIES

Only those who have visited Japan during the spring months, or others who have seen the famous planting along the Potomac in Washington, D. C., can realize the fairyland of beauty presented by hundreds of these Cherries in full flower. No words can do justice to such a sight—its splendor literally takes one’s breath away.

A rich, open soil and sunny position are, of course, desirable, but so long as the drainage is good and there is a sufficiency of moisture at the roots they will grow almost anywhere.

PLANT LARGE TREES — SAVE YEARS OF WAITING

Our Automotive Mover

We are now able to offer the use of one of the largest types of automotive tree movers available today. With this modern machine we can successfully transplant mature trees up to twelve inches in diameter in the most efficient manner.

The prices quoted here include moving with a large ball of earth, and are subject to deviation dependent upon conditions at point of location.

GRAFTED, PLANT SPECIALTIES

Each year there are many plant novelties introduced into the horticultural world. Of special interest and unusual merit are these species of plants, grafted on tall single stems. There, several feet above the ground, the variety develops into a plant of its usual characteristics. Hence there is little need to say that these specialties are unique.

ROSES

Throughout many centuries the Rose has been rightly regarded as the "Queen of Flowers." This feeling is entirely justified as, indeed, there is scarcely any other flowering plant which, in return for so little money and effort, can return such an abundance of beauty and charm over such a long season.

There is every indication that Roses have been cultivated and loved before and since the dawn of written history. We find written records showing that after the fall of Rome and during the Dark Ages in Europe, the early Christians cultivated Roses and introduced the flowers into their ceremonies; the Rosary or string of prayers being first formed of the hips or seed pods of these plants in the seventh century.

In her book on "Old Time Gardens," Alice Morse Earle tells us how "the Persians gather before a single plant in flower; they spread their rugs, and pray before it; and sit and meditate before it; sip sherbet, play the lute and guitar in the moonlight; bring their friends and stand as in a vision, then talk in praise of it, and then all serenade it with an ode from Hafiz and depart." So it is that we would gather our friends around these exquisite Roses offered here, and like the Persians we would praise these Roses in sunlight and by moonlight, and sing their beauty in verse.

CULTURE—We cannot go into the details of Rose culture here, but upon request by telephone, mail, or in person, we shall be pleased to furnish our many customers and friends with our "Rose Culture" pamphlet which thoroughly explains the method of planting our potted Roses, and how to prune and care for them in general.

All of our Roses are strong, budded, two-year-old, field-grown plants. They are A No. 1 grade plants, the best grade available on the horticultural market today. Being field grown, the plants have developed in a natural way and are of far superior strength and vitality than stock which has been developed into full growth under glass.

For your protection we sell no bare rooted, dormant plants. All our Roses are potted and in a healthy, growing condition, thus making it possible for you to buy a growing and flowering plant at any time during the growing season and plant it in your garden.

All Roses offered here have been tried and tested at our nurseries before offering them to you. We have found them to be of excellent quality and completely satisfactory in every way.

HYBRID TEA ROSES

About 1870 the delicate, ever-blooming Tea Rose was combined with the rugged, once blooming, Hybrid Perpetual. The result was the hardy, ever-blooming Hybrid Tea Rose as we know it today. There are thousands of varieties of them including all that can be desired in form, color and fragrance. There is not a single purpose demanded of the rose which the Hybrid Tea cannot fill. They are equally at home in the informal border or the beds of a formal garden, and wherever they are one receives a full season of exhibition sized blooms. The Hybrid Tea is certainly unsurpassed as a cut flower for house decoration or for the buttonhole.

The varieties we offer have been carefully chosen as those best representing the Hybrid Tea Roses, and most adaptable to our weather conditions.

NEW HYBRID PATENTED TEA ROSES

On May 23, 1930, President Hoover signed the Townsend-Purnell Act which so amended the patent laws as to make all newly developed plants patentable the same as any mechanical device or method. Hence the right of propagation of all the new patented varieties is controlled exclusively by the originator as is the right of sale and the selling price.

The roses listed below, as well as a few of the other plants throughout the catalog, represent the finest of the new patented varieties, and are guaranteed unique in that they have merited the right of patent.

TALISMAN—Rich yellow and rose-red, two tone bloom. \$2.50 each.

HYBRID PERPETUALS

These are more hardy, upright and vigorous than the Hybrid Teas; some are recurrent in bloom, but all provide a great profusion of flowers in June. Being of a bolder habit and of a higher growth, they are best planted in the background of the rose-garden. The flowers are large, brilliant, and in the full range of the usual rose colors except clear yellow.

AMERICAN BEAUTY—A very popular cerise-red variety. 75c each.

FRAU KARL DRUSCHKI—Lasting, large, snow white blooms. The most popular white rose in the world. 75c each.

All Our Roses Are Planted in These Containers and in a Healthy Growing Condition

HARDY HERBACEOUS OR PERENNIAL PLANTS

20c each, 3 for 50c, except where otherwise priced.

By this term is meant such plants as may be allowed to remain permanently in the open ground, whose foliage dies down to or near the ground each autumn, coming forth again with renewed vigor the following spring, giving a continuation of bloom from early spring until frost. All our plants are field grown and are many times larger than seed bed plants.

We are constantly searching for and adding new and rare varieties of merit to our extensive collection.

[Varieties marked with an asterisk (*) are particularly adapted for the rock garden.]

DIRECTIONS FOR ORDERING

Write plainly and give explicit direction as to address and mode of shipment. Shipments will be forwarded exactly as directed but where we are without instructions, we will use our best judgment. All our products are shipped at the purchaser's risk. Any claims for damages should be made promptly to the transportation company's agent at the point of delivery. All goods are carefully packed.

We accept all orders on condition that they shall be void should injury befall them from frost, hail, fire, or causes beyond our control.

TERMS

Prices in this list cancel all previous lists and quotations. Customers unknown to us will please send cash or references with orders. Accounts are due when bills are rendered and prompt payments are expected. Prices given in this list are f. o. b. Castle-ton, Ind. Higher prices will be charged for specimens of higher quality selected by the customer or his representative.

Lots of 5, 50 and 500 trees or plants will be charged for at 10, 100 and 1,000 rates. These prices include packing costs, except on excessively bulky pieces, for which cost of packing will be extra.

GUARANTEE AND CLAIMS

All goods are guaranteed true to name, up to grade, full count, and in good condition when they leave our nurseries. We use the greatest care to have all our trees and plants true to name and will replace any that prove untrue or refund purchase price.

OUR SPECIAL REPLACEMENT GUARANTEE

The plants selected by you represent to pick of our entire stock and are healthy, strong and vigorous, and if properly taken care of are sure to thrive for you. Due to the fact that we have no control over the treatment they receive after they leave our nursery, we make the following guarantee:

Any shrubs or trees, purchased at our regular retail price, dying within the first growing season, will be replaced at our nursery at one-half the original price. This guarantee applies to rose bushes and perennials only to the first of November of the year purchased. Where it is necessary to deliver and plant the stock, the labor involved will be charged at cost. Plants are living organisms and their success depends upon the care you give them. Treat them well and do not hesitate to confer with us at any time regarding the care that should be given them. We want them to grow and thrive for you.

PLANTING

At a small additional charge per plant or tree we will plant upon your grounds any of the stock named in this catalogue.

An extra charge of 50 per cent is made for balling deciduous plants not marked B & B either in the dormant season or when in full leaf for summer planting.

DELIVERY

We deliver free to Indianapolis and within a radius of ten miles from nurseries for all trees and plants bought at the nurseries amounting to \$10 or more.

Arrangements can be made for distant deliveries by motor truck.

Address all communications to The Hillsdale Landscape Company, R. R. 13, Box 158, Indianapolis, Ind. Telephone, BRoadway 5495.

GARDEN FURNITURE, GARDEN POTTERY, GARDEN ORNAMENTS

We represent some of the leading manufacturers and supply houses of the above materials and shall be pleased to quote and submit descriptive literature on any such products in which you may be interested.

TO HELP SOLVE YOUR PROBLEMS

Many problems in the landscape development are commonly recurrent. In an effort to help solve them quickly and easily we are listing plants which we have found to be of the highest value in each case. The secondary details, such as soil conditions, locations, size, color, texture, etc., will narrow these lists until a practical solution to your problem will be found. We hope they will be of use to you and perhaps suggest plants you may have otherwise overlooked.

A Rose Garden Necessity

Beginning in April and continuing through the summer to fall, we spray all our roses here at Hillsdale once each week with Clotrocide spray. We have found it to be very effective in the control of all diseases common to roses. It is economical, simple to use and does not discolor the foliage to any appreciable extent.
